Micro-Office Systems is a leading medical practice management software integrator providing comprehensive solutions and services to medical practices of all sizes. We assist our clients by helping them increase the value of their mission critical medical office software through our innovative custom applications. VARS benefit from Micro-Office Systems' vast experience and suite of tools including – Data Conversions from a variety of Practice Management Systems, HL7 Integration, AnyReport and Toolkits for MicroMD

This year we are introducing a patient-controlled personal health record management system designed to consolidate medical information in one convenient and secure location for easy retrieval and updates. Subscribers can seamlessly transfer personal or family member medical information onto the physician's specific medical forms; reducing the need to complete repetitive medical paperwork. NoMoreClipboard.com was established to develop innovative web-based solutions for consumers seeking to establish an online personal health record (PHR). The NoMoreClipboard.com leadership team leverages its extensive clinical health care and technology experience to create and continually enhance a PHR system that is consumer-friendly, interactive, secure and interoperable with physician practice approaches to capturing patient information. We are taking an early role in advocating these solutions to ensure that dealers are able to control these relationships before other large vendors swoop in.

Since 1977, we, the founders of **Practice Insight, LLC** have been among the pioneers in the evolution of healthcare automation, devoting our entire careers developing, marketing and supporting medical practices. We have been leaders in the healthcare industry, migrating from mainframes to micros, paper claims to developing a claims clearinghouse and from Unix to Microsoft and Linux based products. We understand how a practice works, and our software is designed to be cost effective and intuitive right down to the user's keystrokes.

In today's complex healthcare market, your practice requires an integrated solution to streamline your workflow and experience an increase in efficiency and productivity. Our products are offered on traditional in-house servers as well as an Internet ASP platform to meet your unique needs. Practice Insight will deliver the products and services to assist your success.

The Practice Insight mission is to develop superior, intuitive, secure, and cost-effective software solutions and services designed for healthcare professionals to improve their patient care and practice productivity.

SILK INFORMATION
SYSTEMS

Silk Information Systems, Inc.: Silk is an Enterprise Services provider for physician's practices. Silk provides a unique solution to the physician market by providing a total software and services solution for physicians. Silk offers all of the billing, coding, revenue cycle management and other services along with electronic medical records, practice management and communication software and tools in one simple easy to use web based system. There are no upfront costs for the physicians and Silk is tied to the financial and patient care success of each practice. Silk's easy to absorb percentage of collected revenue model puts Silk on the side of the physician and replaces the traditional vendor customer relationship by creating a financial symbiotic partnership between the provider of software and services with the physician.
